Tips for Showing Fruit & Vegetables

These are derived from RHS Guidelines for producing and presenting the best specimens. Select specimens of uniform size and shape, however imperfect exhibits may still be better than anyone else's and end up with a prize. Root vegetables should be carefully washed to remove soil. Wash with a soft cloth or sponge with plenty of water. Brushing will damage the skin and spoil the appearance of the skin.

Runner Beans Long, slender, straight. Fresh pods of good colour with no outward signs of seeds.

<u>French Beans</u> Straight, fresh tendersnap pods with stalks of even length and colour with no outward signs of seeds.

Beetroot Take care in washing as any marks will show up clearly. Choose specimens with good skin colour, single tap root trimmed to 5cm (2").

Remove small side shoots. Trim tops to 5cm (2").

<u>Cabbages</u> Choose solid heads of equal size with good waxy bloom. Remove only minimum of discoloured outer leaves. Leave 7.5 cm (3") stalk. Stage with heads to front.

<u>Carrots / Parsnips</u> Soak soil compost before lifting to retain full root. Select for uniform roots of good colour. Avoid green around the top. Trim foliage to approx. 7.5 cm (3")

<u>Courgettes</u> Select young tender, shapely, uniform fruits 10 - 15cm (4" - 6") long. Any colour. Stage flat.

<u>Cucumber</u> Fruits should be well matched, of fresh green colour with flower attached.

<u>Leeks</u> The tops should be trimmed to 61cm (24") and the roots washed.

<u>Lettuce</u> Lift with roots intact late p.m. or early a.m. to avoid wilting. Fresh heads uniform colour. Wash roots, wrap in moist tissue and tie neatly in plastic bag.

Wash inverted to remove soil from between leaves. Remove only damaged leaves. Stage with firm hearts facing outwards.

<u>Onions/Shallots</u> Wash soil away carefully. Firm uniform size. Trim and tie tops. Trim roots.

<u>Potatoes</u> Select medium sized approx. 180g (6 oz) equally matched tubers with shallow eyes. Choose size to fit neatly in palm of hand (round tubers) or nearly across palm (long tubers). Avoid skin blemishes from pest, disease or damage. Wash in clean water using sponge or soft cloth.

Sweet-corn Husks and silks (tassels) must be retained and 2.5cm(1") of stalk attached. One or two husks should be pulled down and tucked under each cob to reveal grain which should be in straight rows of uniform colour.

<u>Tomatoes</u> Should be characteristic of the variety, ripe but firm, of good colour with calyx attached.

<u>Fruit</u> Neat attractive presentation, symmetrical if possible. Pick berries with stalks intact and present in lines. Stalks and calyces should be green and fresh pointing one way. Handle fruit by stalks to retain bloom and do not polish. Select fresh uniform fruits.
